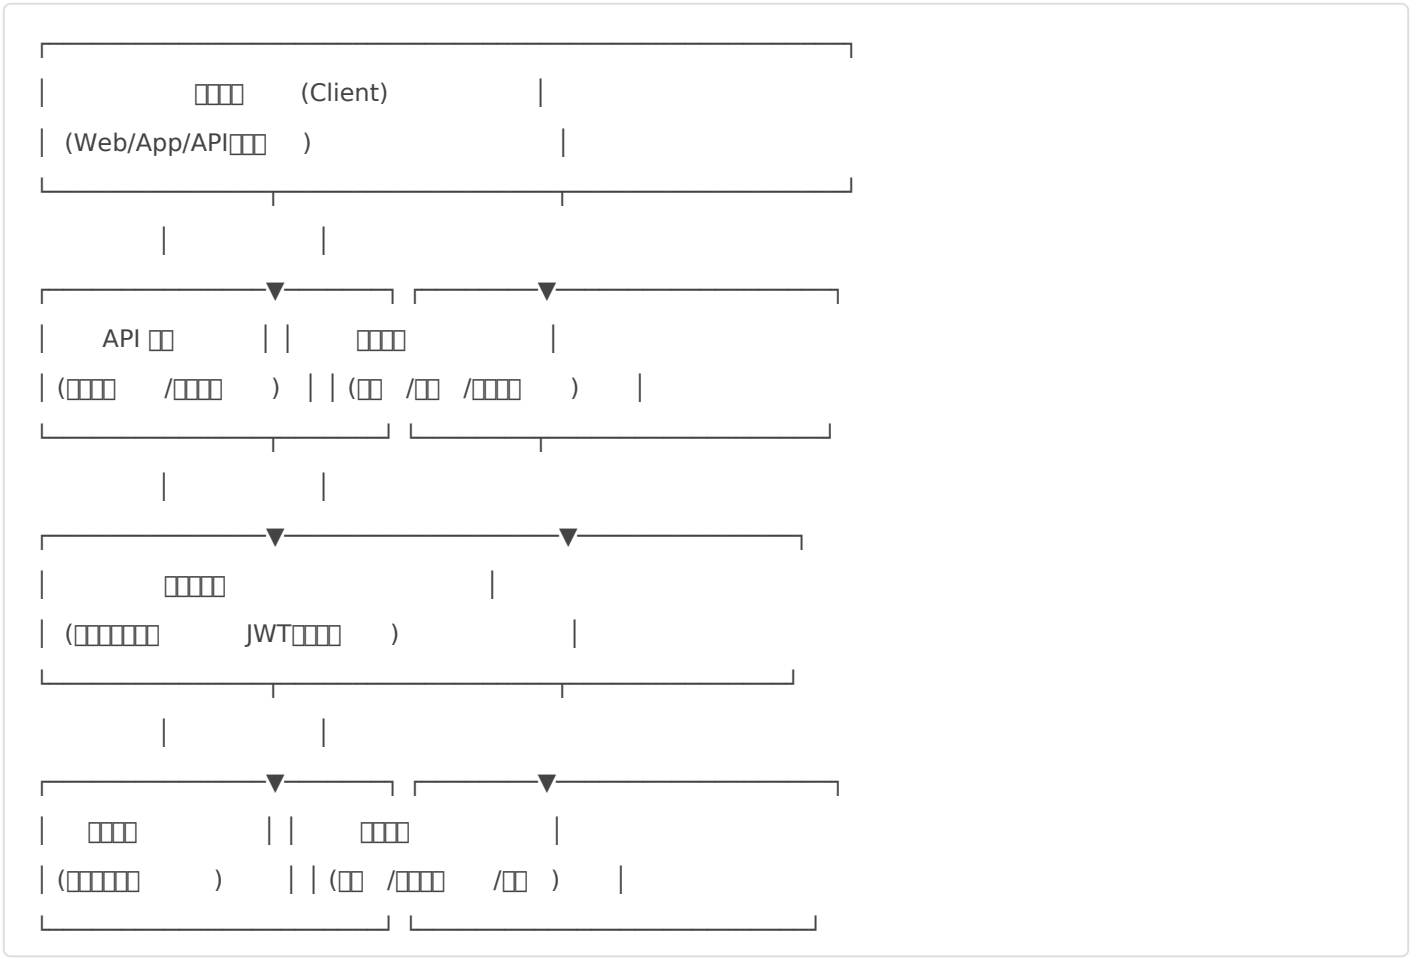
□□□□

1. □□□□□□

□□□



2. □□□□□

2.1 JWT □□□

□□□□ :

```
composer require firebase/php-jwt lcobucci/jwt
```

JWT □□□ :

```
<?php
namespace App\Services\Auth;

use Firebase\JWT\JWT;
use Firebase\JWT\Key;

class JwtService
{
    private $secretKey;
    private $algorithm = 'HS256';

    public function __construct(string $secretKey) {
        $this->secretKey = $secretKey;
    }

    public function generateToken(array $payload, int $expire = 3600): string
    {
        $issuedAt = time();
        $payload += [
            'iat' => $issuedAt,
            'exp' => $issuedAt + $expire,
            'iss' => 'your-auth-service',
            'aud' => 'your-microservices'
        ];

        return JWT::encode($payload, $this->secretKey, $this->algorithm);
    }
```

```
    public function validateToken(string $token): ?array
    {
        try {
            $decoded = JWT::decode($token, new Key($this->secretKey, $this->algorithm));
            return (array)$decoded;
        } catch (\Exception $e) {
            return null;
        }
    }
}
```

2.2 □□□□□

RBAC (□□□□□□□□□) □□□□□ :

```
CREATE TABLE `users` (
  `id` bigint PRIMARY KEY AUTO_INCREMENT,
  `username` varchar(255) UNIQUE NOT NULL,
  `password_hash` varchar(255) NOT NULL
);

CREATE TABLE `roles` (
  `id` int PRIMARY KEY AUTO_INCREMENT,
  `name` varchar(255) UNIQUE NOT NULL,
  `description` varchar(255)
);

CREATE TABLE `user_roles` (
  `user_id` bigint,
  `role_id` int,
  PRIMARY KEY (`user_id`, `role_id`)
);

CREATE TABLE `permissions` (
  `id` int PRIMARY KEY AUTO_INCREMENT,
  `name` varchar(255) UNIQUE NOT NULL,
  `description` varchar(255)
);
```

```
CREATE TABLE `role_permissions` (
  `role_id` int,
  `permission_id` int,
  PRIMARY KEY (`role_id`, `permission_id`)
);
```

□□□□□□ :

```
<?php
namespace App\Services\Auth;
